

## ONE PLANET ONE JACKPOT

### WHAT IS REAL LINK™?

Real Link™ is a seamless way of wirelessly linking your table games together whether or not they are in the same casino, state, country or even dispersed throughout the planet. Manage your table game jackpots without any regards to geographical boundaries because with Real Link™, you can truly achieve One Planet, One Jackpot!

Integrated in Dek, this highly secure jackpot management system's role is to wirelessly manage a single shared progressive jackpot across remotely located casino properties. There is no new hardware to buy or infrastructure to add: Real Link™ uses standard internet protocols and existing infrastructure to establish its secure communication channels.

### WHAT IT DOES FOR YOUR CASINOS

In today's gaming world, connectivity is key. Real Link™ will instantly bring your table games to an efficiency and profitability never before achievable by traditionally non-linked table games. Why let your individual tables fend for themselves on crowded casino floors? Connect them to unique jackpots to drive players to your tables. In other words, Real Link™ will give your casino new revenue opportunity streams without having to add more tables or personnel to your floor.

Here is a quick simulation\* of the power of Real Link™ and how a normal blackjack pit can not only be turned into a new revenue driver for your casino but also an attraction and a marketing tool all in one fell swoop.

### SIMULATION DATA

Number of rounds per hour: **70**  
Number of hours of table operation per day: **12**  
Average number of players per round: **3**

Knowing that the jackpot\*\* hits at an average of 222,000 hands, here is the average number of days before the jackpot hits based on the number of linked tables:

Number of linked tables	Average number of days before jackpot hits
<b>1</b>	<b>88</b>
<b>2</b>	<b>44</b>
<b>5</b>	<b>18</b>
<b>10</b>	<b>9</b>
<b>15</b>	<b>6</b>
<b>25</b>	<b>4</b>
<b>50</b>	<b>2</b>

\*Simulation. Results may vary. Number of hands per hour source: Wizard of Odds.

\*\*Numbers based on Lucky Player Jackpot™ estimations.

### Linking multiple tables with Real™ Link will:

- Allow your tables to be more profitable
- Increase the hit frequency of the top award payout attracting more players
- Increase the hit frequency low payout prizes to keep perception of winning high thus keeping your players at the table longer
- Give your Players a tangible feeling of excited expectancy as they will soon learn that jackpot prizes are awarded more frequently at your casino than anywhere else
- Allow your casino to be marketed as being on the cutting edge of table game technology

Because you set the number of hands that will trigger the jackpot, the more table games are linked together, the faster the Mystery Jackpot will be awarded. If your casino starts awarding jackpots every other week, why would players want to play anywhere else?
